

I would like to request a copy of any analysis of sources that may be eligible to seek permit modifications or otherwise change their status as a result of the withdrawal of the Once in Always In policy in January 2018. I am asking for any such analysis that EPA may already have prepared, including any source specific list or analysis that forms the basis for any national analysis or assessment, and any assessment, estimate or projection of the pollution increases that could occur. If there are multiple analyses responsive to this request, I would like a copy of both the most recent and the most comprehensive versions.
